

# **Instructions**

- 1) When you are asked to insert a value, insert and then press "Enter".
- 2) When you are asked to choose from several options, insert the number of the option and then press "Enter".
- 3) If you wish to load to the system data for example, in the beginning choose "1", otherwise choose "2", as the program says.
- 4) The software is very interactive and will guide you.
